

REAR-GUARD®

Versatile safeguarding.

MAXIMIZE SAFETY. MINIMIZE RISK.

REAR-GUARD® Versatile safeguarding.

REAR-GUARD is a professionally designed, custom, expanding machine guarding and fall protection system that reduces worker exposure to hazardous situations around the perimeter of machinery and manufacturing.

Perimeter Guarding

Creates a physical barrier and visual warning, protecting employees from hazardous areas around the perimeter of machines, robotics and other equipment.

- Allows crane and forklift passage
- Mounts to floor
- Mesh and curtain added protection options
- Multi-configuration brackets and posts

Machine Guarding

Presents a physical barrier and visual warning, guarding against employee access to machines and equipment while in operation.

- Quickly folds to a compact size
- Mounts to machine
- Mesh and curtain added protection options
- Multi-configuration brackets and posts

Fall Protection

Protects from falls on loading docks. Design ensures the loading dock doors will not hinder normal dock operations.

- 200lb load bearing
- Wall-mounted or post-mounted
- Does not hinder loading dock door operation
- Easily folds away
- Meets OSHA requirements when properly installed

Steel and Aluminum Construction

Trust the Made in the USA quality and craftsmanship to protect your workers and stands up to harsh manufacturing environments.

- Rugged aluminum expansion frame
- Durable, high gloss powder coated finish
- Post has 10" square gusseted mounting plate for maximum strength
- 2" tube steel mounting posts

Completely Adaptable

Allows for many options, or can be built to fit your specific application. Ideal for difficult-to-guard areas.

- Available sizes are 3, 4, 5 & 6' tall, width is made to order
- Wide selection of mounting brackets and posts
- Mounting posts and brackets have many configurations
- Customizable colors (OSHA standards, DOT, etc.)

Easy to Use/ Compactable

Operates with one-hand and provides maximum clearance for access.

- Floor-to-ceiling clearance
- Crane and forklift passage
- No end pinch hazard
- No tools required

Versatile Bracket and Post Options

Multi-configuration design conforms to almost every application.

Protective Curtains

Stainless Steel Mesh, Military Grade Fabric and Welding Curtains. Maintain good visibility for monitoring operations. Prevent hands, fingers, and other objects from entering the guarded area.

Original RG-1000

Still available. Includes brackets and interlock switch.

Electrical Interlock Switch Options

Prohibits access to equipment during operation. Allows for quick, safe access while not in operation.

Standard Interlock Switch Features:

- Tamper and vibration resistant keyed actuator
- 2 N/C and 1 N/O stainless steel contacts
- NEMA100V-5A, AC-CE & UL approved
- Multiple lockout and tagout points
- Pre-wired switch and cable assemblies available
- Power lock options available
- Integrated with safety relay controls
- Activates "E" stop when gate is opened
- Triggers visual or verbal alarm
- Multiple switch brands available

Unlimited options and safety applications

Many options and custom features available.

- Attaches directly to a machine frame or stands alone with posts
- Flexible stainless steel mesh
- Interface to machine controls
- Military grade nylon fabric mesh
- Safety interlock switches
- Tamper and vibration resistant keyed actuator
- Pre-wired switch and cable assemblies
- Inside frame options
- Outside frame options
- Multiple sizes for minimum side opening and clearance with machine components
- Attaches to side of machine frame for back gauge clearance
- Multiple sizes conform to 4, 5, and 6 foot tall sections
- Mounting posts configured with hinges, switches or both
- OSHA safety colors or custom colors
- Roto-Latch locking option
- Integrates well with Hard-Guard
- Trolley rail system available
- Available as a portable unit for temporary guarding
- Use for portable guarding of testing areas

Internationally proven, adaptable solutions for all of your facility safety needs.

Trust North American Safety Products to help you improve your employee and customer safety programs and maintain OSHA

compliance with our complete line of quality safety solutions, proudly Made in the USA.

VERSA-GUARD®

Original, portable, expanding barricade.

AISLE-GUARD™

Fully customizable expanding barricade.

RESTRICT-GUARD™

Modular, perimeter safeguarding.

ORTHO-MAT®

Anti-fatigue safety floor matting.

WORKZONE-GUARD™

Complete line of safety barriers and cones.

MAXIMIZE SAFETY. MINIMIZE RISK.
