

The Complete Versa-Guard[®] Barrier System Guide

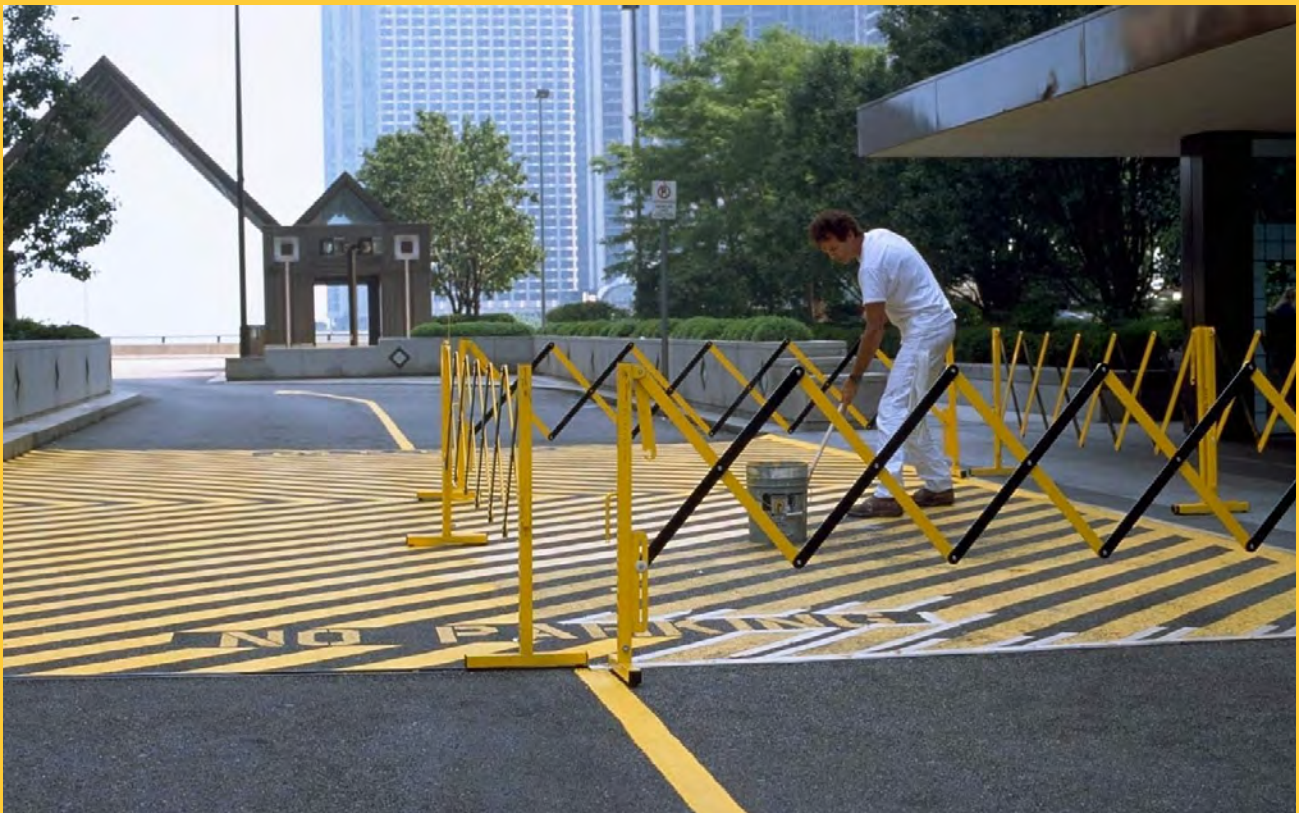

Managing access to spaces, controlling foot traffic, and creating visible safety barriers are important in so many public, workplace, and commercial settings. From airports to schools and from factories to public events, the ability to create effective barriers when and where they're needed keeps people and equipment secure.

It's also critical that the barriers themselves don't create hazards due to instability, inadequate size, pinch points in accordion gates, or hard-to-see colors.

The Versa-Guard® barricade system from North American Safety Products is an efficient and user-friendly way to provide reliable security in a range of settings. Unlike lower-quality imitation systems that are bulky, flimsy, or difficult to set up, Versa-Guard® makes barrier construction easy and reliable time after time.

This comprehensive guide will explore what makes the Versa-Guard® system stand out against the competition as well as key product features and options.

What is Versa-Guard®?

Versa-Guard® is our flagship accordion barrier product, first introduced in 1995 to provide “safety on the ready” in just about any setting. This system is portable, adaptable to a variety of use cases, and convenient. As a modular system, it features sturdy yet lightweight expanding units that can be used independently or linked together. Each unit is available in a range of highly visible colors, including DOT, OSHA, and NRC compliant colors. All of our Versa-Guard® barricades are available with or without locking casters, and include a handle for easy carrying by just one person.

Features and Benefits in Any Setting

Versa-Guard® accordion barricades are easy to transport, set up, take down, and store. Because they are modular and made of durable steel and aluminum, they can be used anywhere that people or equipment need safeguarding, including:

Airports

Loading docks

Construction sites

Parking garages

Factories

Public transportation stations

Government buildings

Recreation centers

Healthcare facilities

Restaurants

Hotels

Schools

Indoor or outdoor events

Shopping malls

Industrial facilities

Warehouses

I Key Versa-Guard® Barricade Features

● Durable construction

The accordion portions of Versa-Guard® barricades are constructed using round-edge aluminum bars with no sharp edges, and the sturdy, powder-coated steel frame withstands both indoor and outdoor extreme conditions.

● Accordion design

Collapsible design that opens and closes smoothly.

● On-board carrying handles

Handles double as sturdy brackets for interlocking multiple units together to protect larger areas.

● Lightweight, compact construction

The original Versa-Guard® weighs only 25 pounds, and is easily carried by one person. When collapsed, the built-in handle makes carrying as simple as lifting a suitcase or toolbox.

● Compliant colors

Barricades are available in multiple color combinations for compliance with DOT, OSHA, and NRC applications.

● Made in the USA

Our entire line of Versa-Guard® barricade products is manufactured in the United States.

I Benefits That Make All the Difference

● Versatility

Barricades are available in 37 and 48 in. heights and 11 ft. 4 in. or 15 ft. 1 in. expanded widths. Multiple units can also be linked for a longer span, and a range of accessories can be added for floor or wall mounting, signage, and other options.

● Modularity without tools

Easily add additional accordion units and secure with built-in interlocking carrying handles. No extra tools or hardware are required.

● Quick setup and tear-down

Versa-Guard® barricades quickly expand and contract, and nest for easy storage.

● Portability

Weighing in at 25, 27, or 37 lbs., the barricades are easy for one person to carry and set up.

● Sturdy and safe to use

Rounded corners, locking casters, sturdy construction, and a design that eliminates pinch points prevent barricade-related hazards and injuries.

Versa-Guard® Expandable Barricade Options

Versa-Guard® barriers from North American Safety Products are available in three basic models to streamline your safety equipment without compromising on quality and reliable performance. Optional locking casters, several accessories, and multiple color options for regulatory compliance in certain applications are also available.

VG-1000

- Height: 37 in.
- Width: 17 in. (closed) to 11 ft. 4 in. (expanded)
- Carrying Weight: 25 lbs.
- Supporting Feet: 14.5 in. axles (2)

VG-1015

- Height: 37 in.
- Width: 22 in. (closed) to 15 ft. 1in. (expanded)
- Carrying Weight: 36 lbs.
- Supporting Feet: 14.5 in. axles (3)

VG-1048

- Height: 48 in.
- Width: 17 in. (closed) to 11 ft. 4 in. (expanded)
- Carrying Weight: 27 lbs.
- Supporting Feet: 18 in. axles (2)

Optional accessories for our Versa-Guard® barricades include a fixed-position locking bar, floor-mounting brackets, flashing lamps, flag holders, locking caster feet, storage nests, sign-hanging brackets, a hand sanitizer dispenser, and wall mounting kits.

Compliance with Safety Standards

Versa-Guard® barricades are suitable for use in many settings with regulatory requirements for safety equipment including DOT, OSHA, and NRC applications. Our barricades are available in these compliant colors, as well as custom colors:

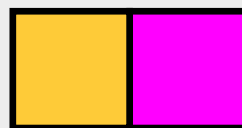

Yellow & Black
(Caution)

White & Red
(Confined Space)

Orange & Black
(Warning)

Yellow & Magenta
(Radiation)

Orange & White
(Traffic)

**Fluorescent Yellow-Green
& Black** (Hi-visibility)

All of the accordion barricades in this line are designed to be sturdy and durable to resist wobbling, tipping, and corrosion. They are easy to secure for a reliable barrier that will not fall or blow over, which risks creating additional safety hazards. Our products comply with all ANSI and OSHA requirements and are made from high-quality steel and aluminum.

Get started with Versa-Guard® from North American Safety Products

Since 1995, the Versa-Guard® system from North American Safety Products has provided durable, sturdy, user-friendly accordion barricades for a variety of work, school, public, and commercial settings. Our products stand out from alternatives because they are made from high-quality materials, are highly portable, simplify security, and are easy to tailor to your space and application. Customers worldwide trust the Versa-Guard® name for hazard protection and area access management.

About NASP

Founded in 1995, Marty Mobeck created North American Safety Products with one product, our flagship product, the Original Versa-Guard®.

VERSA-GUARD® is a professionally designed, highly portable, highly versatile, expanding barricade. It is highly visible, convenient and complies with safety regulations, weighing only 25 pounds, commonly known as “Safety on the Ready”.

The Original Versa-Guard® was found across the country in local Home Improvement Stores, Metro Stations, or many Manufacturing Facilities. It was through many years of success with the renowned and branded Versa-Guard® that additional products were the next step of our company evolution.
